

The graph illustrates the growth of the elderly population in the United States. The horizontal axis (x-axis) marks the years from 1960 to 1990. The vertical axis (y-axis) measures the population in millions, with major grid lines every 10 million units. The data points are connected by a solid line. Key points on the line are labeled: 15.1 million in 1970 and 98.5 million in 1990. The line shows a steady increase from 1960 to 1970, followed by a more rapid growth rate through 1990.

Year	Population (millions)
1960	~25
1970	15.1
1980	~65
1990	98.5
